Q12. What was good about the TA?

1. All
2. He is patient introducing difficult ideas to us.
3. He is slow in pace which is easy to follow for beginners
4. He was very clear when explaining the labs.
5. help you deal with your problems
6. set up a problem-solving system, provide a way to let student ask question without putting up the hands.

Q13. How might the TA improve?

1. Give more help when students are answering questions
2. None
3. Sometimes he spent too much time with the easy part, and then rushed on the most complex parts of the labs.
4. no
5. seems to be nothing.

Note: Please note that the aggregate statistics for department, school and university will be subjected to an updating and finalized on 23 January 2019

^ Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):

1. Adjusted statistics are calculated to provide a reference with extreme responses being excluded.
2. If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.
3. Adjusted statistics will be provided up to course level if and only if they meet the following conditions:

Level of adjusted statistics	Conditions
Survey level	The survey receives 3 or more responses.
Section level	(1) All surveys receive 3 or more responses; AND
	(2) This section is taught by One teaching staff only (instructor / TA).

<i>Course level</i>	<i>(1) All surveys receive 3 or more responses; AND</i>
	<i>(2) This course is taught by One teaching staff only (instructor / TA).</i>

If no adjusted statistics is provided, it will be marked as "-" in this report.
