Q10. Please provide any further comments about the TA(s)/TSS below. For example, you may write about their good teaching practices that you observed; the improvements the TA(s)/TSS could make in their teaching; and whether the tutorial / laboratory classes were inclusive and accommodated students from different cultural and/or language backgrounds.

1. It feels a bit silly to let students answer question 1 by 1
2. No
3. Peter always answer B while someone are asking A question. Wasting time. Asking my course mate question is more effective than asking him.
4. The TAs were helpful and responded timely, made sure the lab session went smoothly
5. The labs could be more effective, if it takes so much time anyway it might well have a physical lab session
6. They are nice!
7. no
8. not a wise schedule

Note: Please note that the aggregate statistics for department, school and university will be subjected to an updating and finalized on 6 July 2023

^ Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):

1. Adjusted statistics are calculated to provide a reference with extreme responses being excluded.
2. If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.
3. Adjusted statistics will be provided up to course level if and only if they meet the following conditions:

Level of adjusted statistics	Conditions
Survey level	The survey receives 3 or more responses.
Section level	(1) All surveys receive 3 or more responses; AND
	(2) This section is taught by One instructor, teaching support staff, or teaching assistant.
Course level	(1) All surveys receive 3 or more responses; AND
	(2) This course is taught by One instructor, teaching support staff, or teaching assistant.

If no adjusted statistics is provided, it will be marked as "-" in this report.
