Q10. Please provide any further comments about the TA(s)/TSS below. For example, you may write about their good teaching practices that you observed; the improvements the TA(s)/TSS could make in their teaching; and whether the tutorial / laboratory classes were inclusive and accommodated students from different cultural and/or language backgrounds.

1. Both TA Junzi Li and Peter Chung delivered the tutorial section in a professional and interactive way. They also answered students' questions clearly with patient.
2. I think the labs could be a lot more interactive rather than just another lecture
3. Peter <3 , fast grading
4. Peter is the best out of the TAs. He explains things well before the programming assignments and exams. Other Ta didn't do much explanation compare to Peter.
5. make sure the TA is familiar with the material they are going to teach, especially yixin yang, the teaching is so horrible that it seems she dont even understand the slides (apparently she is skipping the words which she did not know how to pronounce and she is just reading the words in slide, her speaking is so unclear).

^ Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):

1. Adjusted statistics are calculated to provide a reference with extreme responses being excluded.
2. If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.
3. Adjusted statistics will be provided up to course level if and only if they meet the following conditions:

Level of adjusted statistics	Conditions
Survey level	The survey receives 3 or more responses.
Section level	(1) All surveys receive 3 or more responses; AND
	(2) This section is taught by One instructor, teaching support staff, or teaching assistant.
Course level	(1) All surveys receive 3 or more responses; AND
	(2) This course is taught by One instructor, teaching support staff, or teaching assistant.

If no adjusted statistics is provided, it will be marked as "-" in this report.
