Q5. Please provide any further comments about the Teaching Assistant Mr CHUNG, Peter below.

1. Peter Chung is the only reason why this course is passable as he provides clear exam oriented explanations of skills needed to solve problems. However, this is also a reflection of the course material being quite useless as one could easily solve problems on the exam paper without understanding any concept.

Explanatory note on the number of students invited:

Starting from AY2025-26 Fall, the enrollment numbers in SFQ reports will be captured from SIS on the day before survey invitation emails are sent. All students enrolled in the course section at that time will be invited to complete the SFQ survey unless an exclusion request has been approved before the survey start date.
