

# The Hong Kong University of Science and Technology

## Student Feedback Questionnaire

### Instructor - Section Report

SPRING 2020-21

Survey period: 23 April 2021 - 14 May 2021

CHUNG, Kai Lun Peter

#### **COMP-3511-LA4 Operating Systems**

14 student(s) have evaluated the course.

35 student(s) have not evaluated the course.

Percentage of enrolled students responding: 28.6% (14/49)

Adjusted percentage <sup>^</sup> of enrolled students responding: 24.5% (12/49)

#### About the TA

Q1. Please rate the TA overall:

		Weight	Count	Percentage	
A	Very Good	100.0	8	57.1%	
B		75.0	4	28.6%	
C		50.0	1	7.1%	
D		25.0	0	0.0%	
E	Very Bad	0.0	0	0.0%	
NA	Not Applicable		1	7.1%	
	Total		14	100.0%	

	Regular		Adjusted <sup>^</sup>	
Statistics	Mean	SD	Mean	SD
Survey	88.46	16.51	90.91	12.61
Section	85.38	18.63	-	-
Course	79.93	19.63	-	-

Q2. What was good about the TA?

1. Can explain concepts very clear
2. Clear explanation in important concept such as multilevel piping and Banker's algorithm
3. Crystal clear explanations on course materials and even clearer instructions on the programming assignments
4. Response and explain things well
5. The TA is very enthusiastic and he is able to explain concepts in lessons very well. He also gave very clear instructions for the programming assignments. In particular, he wrote a simple website for PA1 that included a code editor together with videos to explain the code, which is very impressive. I think it's rare to find TAs with such passion in HKUST.

Q3. How might the TA improve?

1. A perfect TA does not need any improvement :)
2. I think his talking speed can be a bit faster because I watch his lab sessions in 1.5x speed on Zoom.

Note: Please note that the aggregate statistics for department, school and university will be subjected to an updating and finalized on 8 July 2021

<sup>^</sup> Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):

1. Adjusted statistics are calculated to provide a reference with extreme responses being excluded.
2. If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.

3. *Adjusted statistics will be provided up to course level if and only if they meet the following conditions:*

<i>Level of adjusted statistics</i>	<i>Conditions</i>
<i>Survey level</i>	<i>The survey receives 3 or more responses.</i>
<i>Section level</i>	<i>(1) All surveys receive 3 or more responses; AND</i> <i>(2) This section is taught by One instructor, teaching support staff, or teaching assistant.</i>
<i>Course level</i>	<i>(1) All surveys receive 3 or more responses; AND</i> <i>(2) This course is taught by One instructor, teaching support staff, or teaching assistant.</i>

*If no adjusted statistics is provided, it will be marked as "-" in this report.*
